## PTC Product Focus

### Windchill DynamicDesignLink at a Glance

PTC DynamicDesignLink enables companies and their customers to define a custom-designed product, and supports the engineering activities needed to provide the configuration. PTC DynamicDesignLink is a cost-effective tool to create custom configurations as wanted, without having to define every possible permutation.

With PTC DynamicDesignLink, customers can define the product configurations they really want with unprecedented speed. Working from a pre-defined, on-line catalog of products and assemblies, users collaborate to define the variant of the product that precisely meets the customer's needs. The resultant configuration is then used to drive the MCAD definitions of the parts to create the design. Engineers within the company work with the design and the customer to build the product.

PTC DynamicDesignLink is a powerful ally for corporations who are competing in a commodity market. No longer must the differentiator be price alone. Now the difference is the ability to provide the customer exactly what the customer wants, quickly, cost effectively, and with bigger margins.

## **Tips of the Week**

### **Dynamic Documents in Windchill DynamicDesignLink**

Windchill DynamicDesignLink (DDL) 6.2.6 provides the ability to create Dynamic Documents in a variety of “nice” publishing formats. These documents may contain information that is specific to a generated variant to satisfy requirements for producing custom data sheets, product brochures, etc.

### **E-PROFILES IS HERE!!**

We have been eagerly anticipating the debut of the new electronic version of Profiles Magazine and now it is here! This new web site will supplement the print edition of the magazine and will provide new useful features not feasible with paper media. e-Profiles will provide you with 24x7, worldwide access to key information previously available exclusively in the print version. "Tips & Tricks," a popular feature pioneered by Pro/USER, has also moved to the web and will be expanded as the site matures. Future plans include several foreign-language editions of Profiles for our many international readers. Currently, Profiles is printed in English and Japanese.

Please take a few minutes to check out this new web site. We don't think you will be disappointed.
