- [Pro/MECHANICA Wildfire 2.0, Wildfire, 2001, 2000i2](#)
- [Operating System Requirements](#)

Pro/ENGINEER and Pro/MECHANICA Wildfire 2.0						
Machine	O/S	Graphics Hardware	Driver Version	Date Supported or Certified	Release Datecode	Status
IRIX						
Tezro R16000	IRIX64 6.5.20	VPro V12	N/A	19-Apr-2004	F000	Supported
ª Fuel R14000	IRIX64 6.5.15	VPro V12	N/A	19-Apr-2004	F000	Certified
		VPro V10	N/A	19-Apr-2004	F000	Certified
NOTES						
<ul style="list-style-type: none"> ▪ Window Managers for IRIX: Motif (mwm), 4Dwm ▪ Graphics Software for IRIX: OpenGL, X-Windows ▪ To determine which OS you are running, use the "uname -aR" command. <p>ª Support for Fuel is available in IRIX 6.5.15 and later versions. For IRIX 6.5.15, patch 4487 is required. For IRIX 6.5.19, patch 4997 is required.</p>						

Operating System Requirements

The tables below provide information about SGI software and maintenance releases that may be required to run PTC software with different versions of IRIX.

Maintenance releases can be obtained from SGI Customer Service (1-800-800-4744), or the SGI support website at: <http://support.sgi.com>.

IRIX 6.5 Requirements	
SGI Software	Description
IRIX 6.5	Required - base operating system
ONC/NFS	Optional - NFS support
oe.sw.optinput	Spaceball, Wacom tablet support (optional)
The following patchsets are required for all products and graphics	
Patchset	Description
IRIX 6.5.X	IRIX 6.5 Maintenance Release (version X - the latest version)
MIPSpro 7.2.1.3m or later	Compiler Maintenance Release (for systems with compilers)
NOTES	
<ul style="list-style-type: none"> ▪ Maintenance Releases in IRIX 6.5 are like patchsets in earlier IRIX versions. Newer versions are released periodically and are tested & certified by PTC. New versions should be used in favor of older maintenance releases.
