

# PTC Warranty and Contract Management

BEST-IN-CLASS WARRANTY MANAGEMENT AND ANALYTICS SOFTWARE

## Version 4.6 is Now Available!

PTC is pleased to announce the release of **PTC Warranty and Contract Management 4.6**, offering a number of new features and enhancements to help you and your users increase productivity.

The PTC WCM Solution is a state-of-the-art technology for warranty and service lifecycle management (SLM), specializing in proactive and collaborative service solutions that decrease warranty management costs and increase service revenues.

### Key New Features and Enhancements include:

- **User Interface Modernization & Enhancements**  
The fresh new design of PTC's Warranty and Contract Management enhances the interaction experience while ensuring ease of use across all modules
- **New and easier Menu & Navigation**  
The menu system gives a much clearer view of the functions that are available to each user while still maintaining dynamic security, making it easier to find the needed user function
  - Recently Viewed – allows users to track transactional entries visited and subsequently find them simply by referring to the recently viewed section on the new toggle menu
  - New Global Toggle Quick Link – allows user to get direct access to common functions without having to navigate through the functional menus

- **Interactive Home Page**

- At sign-on, users can see exactly what work has been allocated, to their respective group across all modules represented in linear and interactive charts
- OEM users can see a volume trend of defined transactions, allowing quick snap view of transactional throughput

- **Core application fixes for iWarranty and iService Modules**
