

Windchill 11 upgrade services

PTC GLOBAL SERVICES OFFERS TARGETED APPROACHES TO MOVING TO SMART, CONNECTED PLM

Your business teams are demanding more at lightning speed from your PLM solution and processes.

Windchill 11, a PTC Solution, offers the first PLM platform to deliver groundbreaking new technological advancements in product development data and processes. Learn, how PTC Global Services can assist you in leveraging this new release - fast and in the optimal way for your business.

While the exciting features of Windchill 11 offer great value to your organization, there may be barriers preventing you from moving quickly to leverage these. An existing customized solution, out-of-date working practices, or a misaligned PLM strategy can mean significant burden on your IT, product and engineering teams. There is risk that your new, upgraded solution will not meet your market-driven business initiatives. You need a way to reduce solution complexity, de-risk the upgrade, and modernize your use of the solution so you can confidently move at the speed your business requires to develop new products faster.

The right approach to your upgrade matters

PTC' Global Services will help you determine the right approach for the upgrade of your current PLM solution so you can see increased value from Windchill 11 - quickly. Below are PTC's recommended approaches to Windchill upgrade scenarios:

- **Evaluate overall PLM strategy** – Leverage PTC's point of view on your key PLM processes and to validate your to-be PLM vision.

- **Process standardization** – Take advantage of latest Windchill solution improvements including how well your PLM processes and working methods are meeting the needs of your business.
- **De-customize** – Reduce levels of customization to reduce upgrade risk, duration, and ongoing cost of solution ownership through leveraging out-of-the-box functionality.

- **Deployment to the cloud** – Capture the business value of cloud computing including cost savings and predictability as well as reducing the need to worry about deployment, uptime, problem resolution, and ongoing application management for your solution.

Delivery matters

With the optimal approach for your business, PTC Global Services provides the following services to help you move to Windchill 11 fast with minimal risk, reduced complexity and lower cost of ownership:

- **Strategic services** – Upgrade planning and ongoing alignment between Windchill 11, your PLM strategy and your market-driven business initiatives.
- **Optimization services** – People, process, and technology-focused continuous improvement programs to get the most value from your upgrade including improved working methods, de-customization planning and solution optimization to address your business initiatives.
- **Upgrade services** – Assessment of the key factors for a successful upgrade: infrastructure requirements, process, and de-customization.
- **Rehosting on PTC Cloud Services** – Increased business value by moving to a new, cloud-based deployment and re-hosting your current on-premise solution to our secure environment with SLA-guaranteed high performance and availability.
- **Training & adoption** – End-user training, and role-based solution adoption at scale ensuring maximum value from your Windchill 11 solution.

Experience matters

PTC Global Services' consultants have extensive experience leading PLM implementations with customers in multiple industries. We bring:

- Unmatched depth in PTC product expertise based on our 20+ years of experience and a channel of innovation with PTC R&D.

- Fast time to value – Only PTC Global Services provides Value Ready Deployment, a unique out-of-the-box implementation approach built using PTC GS experience, industry and product best practices, and role-based adoption methods.
- Flexible deployment options that scale to your needs including cloud, SaaS, subscription as well as on-premise.

The benefit is real results faster and at lower cost while delivering the confidence you need to quickly deliver value.
