# IoT University Ambassador Program Case Study Standard Template

The case study will highlight your implementation of ThingWorx in the classroom. The standard case study template provides you with an easy way to organize the information requested. If you have questions or need support in creating your case study, please [contact us](#).

Please provide us with the following information, when creating your case study:

1. University/Department Logo
2. Title of the Program/Department in which ThingWorx will be used
3. High Quality Image that is relevant to the program and/or the school
4. High Quality Image of how ThingWorx Educator Extension was implemented in the university (image of the project)
5. One to four paragraphs on where and how ThingWorx has been, or will be, integrated and used in the classroom. Specifically:
  - Describe the program
  - Describe how the university is implementing the IoT into your curriculum
  - Provide any additional information such as relevant IoT projects you are working on, industry you are working with, etc.
6. Quote from the Coordinating Professor stating how the IoT experience helped the students develop and grow and how IoT prepares students for their future careers
