*These commodities, software, and/or technologies were exported from the United States in accordance with the Export Administration Regulations. Diversion contrary to U.S. law is prohibited.*

Harmonized tariff Code is: 8523.40.4000 (note. old number pre 2007 was:8524.31.0070)

**COMPLIANCE STATEMENT:**

These software products are subject to all provisions of the EAR including general prohibitions for Denied Parties (Part 736, EAR), End-Use/End-User Restrictions (Part 744, EAR), Embargoed Destinations (Part 746, EAR), and Antiboycott (Part 760, EAR).

U.S. export control regulations carry severe administrative, civil, and criminal penalties. The following information is provided for informational purposes only and shall not be relied upon as legal advice.

Under United States Commerce Department regulations, the PTC software products containing encryption features are classified as "unrestricted" "5D002" encryption items eligible for export under License Exception ENC, pursuant to Section 740.17(a) and (b)(1) of the Export Administration Regulations. License Exception ENC is the most common

authorization available for commercial encryption software with a primary function of information security; computing; networking; or sending, receiving or storing information.

U.S. and foreign distributors, resellers or other entities who are not original manufacturers of encryption commodities and software are permitted to use License Exception ENC for PTC software, subject to the applicable terms and conditions of License Exception ENC.

PTC software may generally be exported to both governmental and non-governmental end users worldwide, subject to limitations such as those described below.

An export license is still required for any exports or re-exports of PTC software to:

- Cuba, Iran, Libya, North Korea, Sudan, and Syria.
- "Specially Designated Nationals" listed at: <http://www.treasury.gov/resource-center/sanctions/SDN-List/Pages/default.aspx>
- "Denied Persons" and/or "Entity List" entities - both lists located at: <http://www.bis.doc.gov/index.php/policy-guidance/lists-of-parties-of-concern>
- Entities on the Commerce Department's Unverified List should be considered to raise Red Flags requiring resolution prior to export or re-export (located at: <http://www.bis.doc.gov/index.php/policy-guidance/lists-of-parties-of-concern>).
- The Sectoral Sanctions Identifications (SSI) List (located at: <http://www.treasury.gov/resource-center/sanctions/Programs/Pages/ukraine.aspx>).
- Other restricted parties that may be added by the U.S. government from time to time.
- Licensing requirements may also be triggered by certain restricted end uses, including but not limited to nuclear-related activities, missile proliferation, or chemical/biological weapons-related activities. For this reason special caution should be exercised when dealing with agencies of non-U.S. governments. Exporters should consult: "Know Your Customer" guidance and the related "Red Flags" at the Export Management & Compliance Program page of [www.bis.doc.gov](http://www.bis.doc.gov)

ORACLE NOTE:

The export classification for Oracle software that is purchased with/bundled with PTC solutions is as follows: <http://www.oracle.com/us/products/export/eccn-matrix-software-412042.pdf>. This information is provided by Oracle on an as-is basis.
