CERTIFICATION OVERVIEW

The ThingWorx Fundamentals Certification validates foundational-level knowledge taught in PTC University's LEARN Online Fundamentals curriculum.

The certification exam is hosted in our Training Central Learning Management System and is administered completely online. The exam is composed of randomly generated multiple-choice questions.

Upon successfully passing the exam, students will be awarded their certification by being granted verified, digital credentials through the [YourAcclaim](#) platform. Credentials remain valid for two years. Once credentials expire, students are encouraged to recertify.

PREPARATION

To successfully pass this exam, students should have a strong foundation of knowledge in ThingWorx. All included topics in this exam are covered in our Fundamentals series of courses:

- Fundamentals Overview
- Fundamentals of Modeling 1
- Fundamentals of Modeling 2
- Fundamentals of Creating a Mashup 1
- Fundamentals of Creating a Mashup 2
- Fundamentals of Connectivity
- Fundamentals of Analytics
- Fundamentals of Deployment
