

Windchill 11 upgrade assessment service

GET THE RIGHT PLAN TO MOVE TO WINDCHILL 11 FAST

Your business teams are demanding more at lightning speed from your PLM solution and processes. Windchill 11, a PTC Solution, offers the first PLM platform to deliver groundbreaking new technological advancements in product development data and processes. However, having the right plan to move fast and without bumps in the road is key for your successful upgrade to Windchill 11. Only if you understand where you are, you can create the right roadmap to get you where you want to go—without detour.

The right roadmap for your upgrade matters

PTC Global Services will help you assess your current Windchill solution to develop the right approach for your upgrade so you can see increased value from Windchill 11—quickly. Below are the key factors addressed by the Windchill 11 Upgrade Assessment Service:

- **Upgrade Readiness & Planning** – Evaluates your current state and identifies upgrade activities that minimize business disruption. We deliver a tailored, cost-effective upgrade approach to optimize your technology investment.
- **Optimal Solution Hosting** – Identifies the right approach for deploying your solution including how you can leverage the PTC Cloud as a hosting solution for cost savings, flexibility and predictability.
- **Upgrade Value Planning** – Targets new solution capabilities from Windchill 11 that address your latest business needs. Identifies opportunities to improve your PLM maturity by modernizing and standardizing your existing practices, user skills and processes for optimal value. Additionally, we will identify overall upgrade risks and the best approach to transition from customized to out-of-the-box functionality.

Delivery matters

The Windchill 11 Upgrade Assessment Service helps you gain an understanding of your business and technical requirements for your upgrade. The service then identifies critical readiness gaps and offers specific recommendations to help you balance the technical, people, process elements of your PLM solution. Using a proven approach to assess what's required for your upgrade, PTC Global Services provides the following services to help you move to Windchill 11 fast with minimal risk, reduced complexity and total cost of ownership:

- **Planning and preparation** – This phase starts with initial customer contact. Our consultants will explain the process and deliverables to you. With your help, appropriate interviewees are identified and overall logistics agreed upon for the onsite portion of the assessment. Where appropriate, a pre-delivery self-assessment will also be provided in advance of the onsite exercise.
- **Onsite interviews and data gathering** – Depending on the depth of the assessment to be performed, our assessment team will visit your site to perform a number of interviews or workshops with your key staff and to undertake other data-gathering activities.
- **Analysis and Improvement Planning** – Our assessment team will analyze the information that is collected and provide a written report and/or a presentation of key findings, highlighting what's required for your successful upgrade looking at the success factors of strategy, processes, adoption, infrastructure, de-customization, and hosting.
- **Final Presentation** – A management presentation is arranged at your site to share the findings and recommendations. At the completion of the engagement, you will receive a copy of the presentation and/or documented report.

Duration: 1 week

Experience matters

PTC Global Services' consultants have extensive experience leading PLM implementations with customers in multiple industries. We bring:

- Unmatched depth in PTC product expertise based on our 20+ years of experience and a channel of innovation with PTC R&D to ensure tight solution alignment with PTC solution roadmap and lowest solution total cost of ownership.
- Fast time to value-only PTC Global Services provides Value Ready Deployment™ a unique out-of-the-box implementation approach built using PTC Global Services experience, industry and product best practices, and role-based adoption methods.
- Flexible deployment options that scale to your needs including cloud, SaaS, subscription as well as on-premise.

The benefit is real results faster and at lower cost while delivering the confidence you need to quickly deliver value.
