

Windchill 11 re-hosting services

EXPLOIT THE POWER OF CLOUD COMPUTING FOR YOUR MOVE TO WINDCHILL 11

Your business teams are demanding more, at lightning speed from your PLM solution and processes. Windchill 11, a PTC Solution, offers the first PLM platform to deliver groundbreaking new technological advancements in product development data and processes. At the same time, you are seeking the cost and flexibility advantages of the cloud for your infrastructure, platform and software as-a-service. Now you can have both– Windchill 11 with the benefits of a cloud-based deployment.

The right approach to re-hosting matters

PTC Global Services will help with the best approach for re-hosting your current Windchill solution so you can see increased value from Windchill 11 - quickly. We can help you analyze the requirements and benefits of re-hosting in the PTC Cloud to deliver the optimal business value of cloud computing including cost savings and predictability. Here's what to consider with re-hosting using PTC Cloud Services:

- **Business case for re-hosting** – Ensure you have a clear view of the value of moving from an on-premise solution to a cloud solution.
- **Evaluate level of customization** – Understand your current level of customization and your plans to de-customize to out-of-the-box functionality.
- **Upgrade planning and optimization** – Based on your desired state, ensure you are optimizing people, process, and technology to receive the most value from your upgrade. You will also need to consider a 2-part process – rehosting your solution and upgrading to your future state deployment.

Delivery matters

PTC Global Services use a proven approach to develop the right plan for re-hosting regardless of your current Windchill solution. We can help you move your current Windchill solution to the PTC Cloud and upgrade to out-of-the-box Windchill 11 or if you are a current PTC Cloud customer, we can develop the right plan for your upgrade. This can include all related environments such as testing, training, migration and production environments.

PTC Global Services provides the services to help you quickly re-host Windchill 11 with minimal risk, reduced complexity and low total cost of ownership including:

- **Re-hosting quality audit** – Analyze your current system comparing against PTC best practices to identify upgradability, maintenance & performance risks.
- **Implement re-hosted solution** – Move your solution to the PTC Cloud including identity Management/LDAP connectivity, interfaces to other systems, PLM client performance and resolving any risks from the audit phase.
- **Optimize your solution** – Define continuous improvement programs to get the most value from your upgrade including improved working methods, de-customization planning and solution optimization to address your business initiatives. For customizations and integrations that you wish to maintain, we can also re-host through PTC Extended Cloud Services.
- **Upgrade execution** – PTC Value-Ready Deployments provide fast, prescriptive Windchill 11 capability deployment and upgrade, based on PTC best practices using an out-of-the-box approach.

Experience matters

PTC Global Services' consultants have extensive experience with Cloud Services from over 15 years as a hosting provider with customers in multiple industries. We bring:

- Unmatched depth in PTC product expertise based on our 20+ years of experience and a channel of innovation with PTC R&D.
- Fast time to value – Only PTC Global Services provides Value Ready Deployment, a unique out-of-the-box implementation approach built using PTC Global Services experience, industry and product best practices, and role-based adoption methods. This also provides the opportunity to expand into new cloud solutions from PTC.

- Flexible deployment options that scale to your needs including cloud, and SaaS as well as on-premise.
- Full breadth of coverage including application administration, platform management, and a industry-standard secure infrastructure, PTC Cloud Services functions as your single point of support accountability for your cloud solution.

The benefit is faster results and lower cost while delivering the confidence you need to quickly deliver value.
